

Not-for-Profit AI Workshops

AI is rapidly changing the world around us. It brings huge opportunity, but also significant risks, which could impact both your strategic mission and goals, as well as your day-to-day operations.

Brief Description of Workshop

This interactive workshop will introduce the opportunities and risks associated with the current revolution in Artificial Intelligence, exploring the implications for your not-for-profit organisation. Completion of the workshop will leave you and your team with a list of practical and simple next-steps to start on your AI journey.

Target Audience

Leadership teams who are keen to understand the implications of Artificial Intelligence (AI) for the strategy and goals of their charity, social enterprise or other not-for-profit organisation, and want to approach AI deployment and decision making with confidence.

Aims

- Understand the opportunities and risks associated with Artificial Intelligence
- Explore the specific implications for your organisation and how it could impact your strategy, workforce, service design, business processes, plans and community
- Prioritise some simple next steps to testing the use of AI in your organisation.

Logistics

2.5 hour session either face-to-face or online.

“AI has put what would previously have required huge computing power and millions and millions of pounds worth of investment into the hands of every single individual and every single organisation.”

Tim Cook, [AIConfident](#)

Bringing Change Together.

Sample Agenda

The agenda will be tailored according to requirements and AI experience but will include:

1. Introduction to AI: Explanation of AI, the wider policy and strategy context and what could be possible in the not-for-profit sector
2. Risks and governance
3. The implications for your organisation now and in the future
4. Prioritisation of next steps including opportunities and risks.

Delivery Team

The workshop will be managed by a senior consultant from Eastside People with the main content delivered by Tim Cook of [AIConfident](#).

Deliverables

- Bespoke workshop based on key components of your organisation's strategy/ vision, and theory of change
- 2.5 hour in-person team workshop
- Full write up including actions and suggested next steps.

Pricing:

Workshop pricing is available on request.

Post Workshop Next Steps

Taking the organisation on a journey to AI confidence' that could include:

- 'Inspire' training sessions for staff or managers in opportunities/risks
- Supporting good governance by developing and putting in place AI policy guidelines
- Workshopping some specific AI Use Cases
- Workshopping the implications for the community you serve, and the actions that you might wish to take as a result.

Request a Workshop:
